genie

The Covert Range

AHD MODELS

Genie's covert range is a series of 2.1MP AHD technology high definition cameras housed in many everyday items such as a PIR detector, smoke detector casing (sideway and downwards view options), an electrical junction box, or a wall mounted thermostat casing. Each model is a great option for a covert application. We also have discreet models for special applications too.

NETWORK IP MODELS

Genie also have a series of 2MP and 4mp Network IP technology high definition cameras in the covert range. Again, they are housed in many everyday items such as a PIR detector, smoke detector casing (sideway and downwards view options), or an electrical junction box. Each model is a great option for a covert application. We also have discreet models for special applications too.
